(19871030)

AB- PURPOSE: To obtain a shock absorber which is simple in structure and
that can be manufactured at low price by sealing a liquid and a solid
in a receptacle to exhibit a shock absorbing function.

CONSTITUTION: An incompressible liquid 3 and powder which exhibits
elasticity when it receives external pressure or a sponge-like, that
is, solid substance 4 are sealed in a receptacle formed by rubber,
plastic, metal or the like to exit together therein.
